AMENDMENTS TO BILL NO. 77

(the universities act)

Bill 77, respecting Provincial Universities, was passed by the third session of the 15th Legislature of the Province of Alberta on April 13th.

The Bill was passed on the recommendations of the Governors of the University of Alberta as set out in their report and the main purpose of the Bill was to establish two separate provincial Universities - the University of Alberta and the University of Calgary, and to re-organize University administration. Provision was also made for the establishment of additional Universities. In addition, a Universities Commission was established to act as intermediary between the Universities and the Provincial Government and to exercise certain regulatory functions with respect to the Universities.

A portion of the Bill which interestingly enough received a good deal of attention was Section 50, having to do with the use of dogs at the University for medical research purposes.

The approved form of Section 50 now reads:

1. No university and no faculty or school of a university shall purchase dogs for research purposes.
2. A municipality that operates a dog pound shall, upon the request of the faculty of medicine of a university, make available to the faculty for research and teaching purposes all impounded dogs,
 - (a) that have not been claimed by the owner within ten days of the impoundment, and,
 - (b) that would otherwise be destroyed.
3. A municipality is not required to maintain impounded and unclaimed dogs for a period of ten days unless a request has been made to the municipality under subsection (2).

4. The Minister of Health, with the approval of the Lieutenant Governor in Council, shall make regulations respecting,
 - (a) the facilities in which animals acquired for research and teaching purposes shall be sheltered,
 - (b) the care with which they shall be maintained, and,
 - (c) the manner in which any experimental work carried out upon them shall be conducted.

5. The Deputy Minister of Health and the Director of Veterinary Services of the Department of Agriculture shall at least twice each year inspect the premises in which the animals are sheltered and all areas in which medical research is being carried out and at the end of each year they shall submit a report on their inspections to the Minister of Health who shall lay the report before the Legislature at its next ensuing session.

A \$50,000 gift from the Gladys and Merrill Muttart Foundation has been made to the Department of Clinical Medicine, Faculty of Medicine, to assist in the support of a clinical unit for the study of diabetes mellitus and its related disorders.

This is the first unit of its kind in Canada. The presentation was made recently by Mr. & Mrs. Muttart to President W.H. Johns, left, and Dr. Donald R. Wilson, right, Head of the Department of Medicine, at a luncheon meeting in the private dining room of Lister Hall.

The objective of the unit will be to encourage diabetic research, the education and training of physicians with special interests in this area of medicine, and the improvement of the care and treatment of diabetic patients.

Mrs. Muttart, a partner in the Muttart Foundation, has served widely in the field of diabetic work. From 1954-1957 she was National President of the Canadian Diabetic Association and is currently Honorary President of the Alberta division of the C.D.A.

FACULTY NOTES

A new 30-minute 16 mm. color film with sound portraying in dynamic fashion the role of modern agriculture in the Canadian economy and revealing the excellent opportunities available for graduates in agriculture has just been received at the University. The film, sponsored by the Wawanesa Mutual Insurance Co., is available on loan from the Faculty of Agriculture to schools, 4-H groups, and to any other groups interested in better understanding opportunities for those with higher education in Agriculture, as well as for those wishing to better understand Canada's modern agriculture.

Unique is the presentation on screen of seven men prominent in the fields of Canadian business, education and journalism, combining their thoughts to explain the relationship between agriculture and business, while emphasizing the importance of education.

FRANK DOUGLAS JONES has been appointed Associate Professor of Law at the University of Alberta. He will be teaching taxation, estate planning and commercial law.

Mr. Jones, a native of Edmonton, received his Bachelor of Arts degree from the University of Alberta in 1956, his Bachelor of Law degree from Dalhousie Law School in Halifax in 1959, and a Master of Law degree from the University of Toronto in 1960.

Mr. Murray E. Mickleborough, a senior student in the Faculty of Dentistry, has been awarded first prize in the undergraduate section of the Edward H. Hatton Awards Competition for his paper on original research by a novice. The award, open to international competition, was made recently at the annual meeting of the International Association of Dental Research in Miami, Florida.

Mr. Mickleborough conducted his research study, "The Metabolism of Certain Carbohydrate Constituents of Rat Submaxillary Gland," under the guidance of Professor Jules Tuba, Head of the Division of Biochemistry, Faculty of Dentistry. It was supported in part by a grant from the Associate Committee on Dental Research, National Research Council. This is the first time that the award has been won by an undergraduate student in a Canadian dental School.

Effective April 1, 1966, the Faculty of Business Administration and Commerce was separated into three divisions: Business Operations; Business Analysis; and Business Policies.

The University of Alberta's Faculty of Business Administration and Commerce, this year celebrating its 50th Anniversary, is holding its third annual Student-Business Seminar at the Banff School of Fine Arts from April 29 to May 1. The objective of the Seminar is to provide third-year students of Business Administration and Commerce with an opportunity to meet representatives from business and government, thereby assisting them in their selection of a future career. In addition to U of A student representatives, there will be student representatives from the University of Saskatchewan, the University of Calgary, and the University of British Columbia.

DR. WALTER C. MACKENZIE, Dean of Medicine since 1959, will be accorded an honorary doctor's degree from Dalhousie University, his Alma Mater, in May. Dr. MacKenzie is currently President of the American College of Surgeons.

DR. R. B. J. MACNAB, Faculty of Physical Education, has recently been appointed Canada's representative on the International Committee for the Standardization of Physical Fitness Tests, a subcommittee of the International Academy of Sport Sciences. DR. M. L. HOWELL, also on staff, is the only other Canadian representative. Drs. Macnab and Howell were recent recipients of a Department of National Health and Welfare grant of \$29,000 to study the work capacity of Canadian children.
